

# Water-saving Systems

## 4EVR RECYCLING SYSTEM

*Recycle grey water from any household to water the garden and grass*

- Pipes leading from inside house are extended to channel grey water to the 4EVR storing tank
- Filter in extended pipe filters out hair and body fat
- Water pumped from storage tank to irrigate garden and lawns
- Durable Polyethylene - no rust or corrosion
- Closed unit - no leakage or evaporation
- Easily cleaned and maintained

Code GWS2 - 5  
Above Ground  
200 - 500 litres

Code GWS1  
Below Ground  
Nominal 240 to 1000 litres

\* these parts not supplied by 4EVR

## STORAGE TANK SYSTEM

Code RWS

*Store rainwater from your gutters at home or work for irrigation purposes*

- Pipes leading from gutters on roof are extended to channel rain water into the 4EVR storing tank
- Extended pipe with filter catches leaves and other debris from the gutters
- Water to be pumped from storage tank to wet garden and grass
- Durable Polyethylene
- Non corrosive and no rust
- Closed unit minimizes evaporation and leakage
- Easily cleaned and maintained
